PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in data validation, KPI dashboard development, and risk/trend analysis across financial, customer, and operational datasets. Skilled in building structured reporting frameworks, maintaining data accuracy and governance standards, and translating raw data into decision-ready insights for management and audit stakeholders. Seeking a Compliance Data Analyst role to apply strong data governance, dashboarding, and analytical reporting skills within a structured compliance function.

KEY SKILLS

- Data Validation & Data Governance: data cleaning, accuracy/completeness checks, structured documentation, version-controlled reporting
- Compliance & Risk Reporting: KPI dashboards, risk indicator tracking, trend/anomaly identification, periodic management reporting
- Automated Reporting Tools: Power BI (DAX, Power Query), Tableau, Excel (Pivot Tables, VLOOKUP), Python-based reporting automation
- Programming & Databases: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL (MySQL, PostgreSQL, SQLite), R
- Analytical Methods: EDA, Statistical Analysis, Hypothesis Testing, A/B Testing, Regression, Predictive Modeling, RFM & Cohort Analysis
- Tools & Platforms: Git/GitHub, Jupyter Notebook, Google Analytics

PROFESSIONAL EXPERIENCE

AirTech Sales - HVAC & Engineering Solutions

Mumbai, India | 2025 - Present

Operations & Client Coordination Executive

- Maintain accurate, audit-ready records for site activity, invoicing, and contractor documentation, ensuring data completeness and version-controlled tracking across projects
- Coordinate across site, client, and vendor stakeholders to validate operational data and resolve discrepancies before reporting to management
- Supervise contractor workflow and installation activity, flagging process gaps relevant to operational risk and compliance

Web Developer Intern - Navrangi Ecommerce Solutions

India

- Automated data extraction and reporting workflows, reducing manual reporting effort by 20% and improving data accuracy
- Analyzed website performance and user behavior data, identifying issues that improved page load time by 25%

Data Analytics Intern - Deloitte (Virtual, via Forage)

- Cleaned and validated financial datasets using Python to assess credit delinquency risk across 5,000+ records
- Conducted EDA to identify trends, anomalies, and high-risk segments, supporting data-driven risk assessment decisions

Data Analytics & Visualization Intern - Tata Group (Virtual, via Forage)

- Analyzed customer and risk datasets using Python and Tableau; built dashboards to communicate KPIs, trends, and risk indicators to stakeholders

Data Analytics Intern - Quantum (Virtual, via Forage)

- Performed customer segmentation analysis on retail transaction data to identify purchasing patterns and support business decisions

RELEVANT PROJECTS

Power BI Sales & HR Dashboards

- Designed interactive Power BI dashboards tracking KPIs, trends, and performance metrics for management reporting
- Improved reporting efficiency and reduced manual reporting effort by 30% through automated dashboard refreshes

Credit Delinquency Risk Analysis

- Performed EDA on financial datasets to identify key risk drivers, correlations, and anomalies impacting delinquency outcomes

EDUCATION

Bachelor of Engineering - Artificial Intelligence & Data Science

2022 - 2025

New Horizon Institute of Technology and Management, Mumbai, India

Diploma in Information Technology

2019 - 2022

Vidyalankar Polytechnic, Mumbai, India

CERTIFICATIONS

Microsoft Power BI - Data Analyst Associate | Google Cloud - Introduction to Generative AI | Coursera - Introduction to Python
